

Global Dedicated Linen

Laundries supplying hotels and restaurants are often asked to supply personalised stock, often with special colours and markings. If the linen is rented there is a need to keep track of the residual value of every batch supplied. If it isn't rented then it is important that every piece processed is recorded and charged for.

Global Dedicated Linen is the ideal solution to all the problems of this market sector. It handles all possible combinations of Linen supply - rental, customer owned or contract laundry - there is even an additional module option to assist with Domestic Linen and 'Agents' for the laundry as well. Agents can include shops, hotels or schools.

Data entry is simplified, as entry of the customer's reference number is followed by the product window, which displays all products currently on the contract. New products can easily be entered, either from the office screens, or within the production area itself. Once a product line is selected a quantity can then be entered as in the window opposite.

Global Dedicated Linen is supplied complete with a suite of enquiries and reports, designed to fulfil the needs of laundry staff, laundry management and laundry clients. Billing options enable a choice of Weekly, Periodic or Calendar Month Billing, this being set at contract level.
